

Tenkara no Oni Shop

Tenkara rods are designed to target relatively small trout and other fish in streams. The ideal game size is up to 40 centimeters or 16 inches length, e.g. iwana and amago. Bigger fish may be not suitable. The rods are aimed for delicate casting. In order to reduce packaging, only rod the sock comes with the rod. Therefore, the rod prices only include a rod and its sock.

	Handle length.....30cm	[Made in Japan]

Please keep in mind that Oni-rod type I is developed for experts. It is difficult for beginners to use. Also, it is designed for char fishing in Japan. Char fish are a maximum of 30 cm. Therefore, please don't try catching large fish of 1m. In general in Japan, owners treat their rods with respect. So, we don't take responsibility for any damage you made. There is no replacement policy (However, we sell replacement parts).

The shipping cost is usually around \$40 for most part of the US.

When your rod is ready, we'll send you the bill through Paypal, and ship the product upon receiving the payment in a timely manner.

If you'd like to go through with your order, please email us again with your choice of rod. Thank you again for your question regarding Oni rods.

We look forward to hearing from you again. Sincerely,
